PROFESSIONAL EXPERIENCE

MORGAN STANLEY, *Software engineer II* (Montreal) August 2023 - now

Stack: Angular 19, Spring Boot, PostgreSQL, Kubernetes, Microsoft Azure, Jenkins

- Contribute to an internal payments and trades dashboard used daily by traders to monitor and handle payments.
- Migrated a legacy C# application to an Angular 19 front end, improving average response time by **40%** for **~100 i**nternal users.
- Refactored and optimized Spring Boot REST APIs and database queries, reducing average latency from **500 ms** to **150 ms.**
- Own end-to-end delivery of new screens (from implementation to production), while collaborating within a cross-functional squad.
- Help maintain a CI/CD pipeline on Azure + Kubernetes, enabling bi-weekly releases with high availability for business users. Apply a TDD approach on new features, achieving very high test coverage on critical payment workflows.

MARCHÉ EPIPRESTO, *Full-stack developer* September 2022 – December 2022

Stack: Expo (React Native), Apollo GraphQL, Node.js, MongoDB

- Developed a mobile e-commerce app with Expo (React Native) for local grocery, meat, and vegetable stores, publishing **500+** products in 4 months.
- Worked across the full stack in a team of 5 (mobile app, backend, and integrations), taking ownership of both front-end and back-end features.
- Migrated the backend from REST to Apollo GraphQL, reducing server round-trips by **20%** and improving average request speed by **40%.**
- Integrated Stripe for secure payments and user flows, supporting **100+** active users on the platform.

NATIONAL BANK OF CANADA, *Back-end developer intern* May 2022 – September 2022

Stack: Spring Boot, PostgreSQL, Cucumber, CI/CD

- Designed and optimized 10+ Spring Boot REST APIs for internal payments management use cases, used by **50+ f**inancial analysts and internal tools.
- Implemented BDD test suites with Cucumber, achieving **100%** coverage on critical business scenarios and improving release confidence.
- Delivered backlog tasks independently, following internal coding standards and code review practices in a regulated environment.

THALES CANADA, *Tools developer intern* September 2021 – December 2021

Stack: MatLab, Symulink

- Automated about **80%** of recurring QA tasks for electronic circuits modeled in MATLAB/Simulink, reducing test execution time from **4 hours to ~30 minutes**.
- Developed an internal electronic simulation tool that improved calculation accuracy by around **20%,** increasing trust in validation results for engineers.

SENTIOM inc. , *IoT developer intern* May 2021 – August 2021

Stack: Linux Bash, Python, Microsoft Azure

- Worked with Raspberry Pi–based devices and sensors to support SENTIOM's goal of reducing water damage in buildings through early detection.
- Implemented an MQTT bridge for **~20** IoT devices, reducing message latency and improving the reliability of real-time sensor data.
- Automated messaging configuration using Bash/UNIX scripts, simplifying deployments and reducing manual setup errors. Built Python scripts to send events to Azure IoT Hub, enabling centralized monitoring and downstream analytics on incoming sensor data

TECHNICAL SKILLS

- **Programming languages:** TypeScript, JavaScript, Python, Java
- **Front-End :** React, Next.js, Angular, Expo Go
- **Back-End :** Node.js, Express, Apollo Server, Spring Boot
- **API:** GraphQL, REST
- **Database:** PostgreSQL, MongoDB
- **Outils & CI/CD :** Docker, Kubernetes, Git, Jest, Cypress, Cucumber
- **Cloud & DevOps:** AWS, Microsoft Azure

FORMATION

ECOLE POLYTECHNIQUE DE MONTRÉAL September 2018 – May 2023
Bachelor of Computer Engineering (B.Eng.)

CERTIFICATIONS

APOLLO GRAPHQL – January 2024
Graph Developer – Associate (https://www.apollographql.com/tutorials/certifications/308df5cd-c118-463f-9024-d9ba27e7c5ea)
Graph Developer – Professional (https://www.apollographql.com/tutorials/certifications/4dd19dad-1454-4bf8-a8df-affb051c127c)

LANGUAGES

- **French:** Native
- **English:** Fluent
